1. Executive summary

To: Caleb, Founder and Chairman. **From:** RIVET-CEO. **Date:** 8 October 2026.

Bottom line. The board recommends you ratify the shortlist below **as a test list, not a launch list**. Spend 14 days and S\$0 on three talk tests and one hamper demand test, then re-rank on evidence. Every robot attacked every other robot's ideas for two rounds. No robot found any evidence that customers will pay, so none of these ideas has earned a launch yet.

How the work was done. On 8 October 2026 you asked the board to start from a clean slate. Five robots (LEDGER, SERVO, COGSWORTH, PROBE, BEACON) each proposed 6 to 8 ideas from their own lens in Round 1. In Round 2, each read all five Round 1 files and attacked the strongest ideas from any robot, using web searches to settle factual conflicts. I then wrote the synthesis in Round 3. That was 11 robot runs in total. Constraints were fixed: Singapore, S\$5k to S\$20k capital, about 10 hours a week, profit in 6 to 12 months, partnership-led selling.

Ranked shortlist

#	Idea	Base-case profit	Downside	Main objection
1	Centre Desk: WhatsApp enquiry-to-trial-booking service for tuition and enrichment centres	S\$2.6k/mo at month 12	S\$0.4k/mo	BEACON: no edge over incumbents such as SchoolTracs, which bundles WhatsApp from S\$55/mo
2	Club and Coach Desk: website, booking and payments for coaches (S\$500 setup, S\$49/mo), merch as add-on	S\$1.9k/mo	S\$0.3k/mo	LEDGER: no association has agreed to mail the offer
3	CNY Gifting Desk: preorder-only corporate hampers, sealed packs, outsourced packing	S\$3.7k per season (not monthly)	S\$0.4k per season	PROBE: no demand data
4	Dementia home kit (non-electronic, non-monitoring items only)	about S\$1.6k/mo (RIVET estimate, not modelled by LEDGER)	S\$0.4k/mo	LEDGER: inventory risk
5	Vet-Shelf: non-meat pet treats on consignment at groomers	S\$540/mo	S\$135/mo	COGSWORTH and SERVO want it cut; weakest slot
R1	Reserve: PDPA data-protection add-on sold through accountants and company secretaries	S\$0.6k/mo	S\$0.04k/mo	Liability; near-zero profit
R2	Reserve: lead-response service for aircon, cleaning and renovation firms	S\$2.6k/mo	S\$0.4k/mo	Owners drop tools after about 2 months

All profit figures are estimates (LEDGER's models unless stated). Profit is before your own time.

The five findings that matter

- **The income ceiling.** At 10 hours a week, a B2B service tops out at about S\$1.7k (COGSWORTH) to S\$3.2k (LEDGER) a month in the base case, and the downside is only S\$0.3k to S\$0.4k at month 12. That meets "profit in 6 to 12 months" in the base case. It does not replace a salary. The board's recommendation is to treat it as a stepping stone, price first, and test ROD fees of both S\$150 and S\$250 a month.
- **WhatsApp reminders are crowded.** Clinic recall is dead: free government SMS tools and Bot MD already cover it. Tuition reminders and attendance are covered by SchoolTracs and others. Centre Desk survives only as an enquiry-to-trial front desk, and the client must pay the platform fee on their own account. If ROD pays it, gross margin is 12% in the base case and negative in the downside, and LEDGER's K6 veto applies.
- **The dementia kit is not blocked by HSA after all.** COGSWORTH withdrew the regulatory wall: a non-electronic, non-monitoring kit with no treatment claims counts as wellness. Trackers, alarms and dispensers stay excluded. Whether wander door-alarms count is unconfirmed.
- **Direct dried-food import died.** Margins of 15% to 25% fail the K6 test, and repacking food needs a licensed premises (SFA fined an unlicensed repacker S\$2,500 in 2024). Gifting with sealed, pre-packed goods survives; the old dried-food seed idea does not.
- **A hard clock on hampers.** Chinese New Year 2027 is 6 February. Decide by **22 October 2026**, with customer deposits by 14 November. Run it only as a capped, zero-spend test of about 7 hours.

What happens in the next two weeks (about 20 hours, all done by 21 October)

Test	Owner	Done when
Hampers: ask 10 HR buyers, get 3 packer quotes, an insurance quote, and an SFA query on sealed packs	Chairman asks; COGSWORTH drafts script; LEDGER builds margin sheet	Written go/no-go against the 22 October gate
Centre Desk: 5 talk tests at the all-in price, and offer 1 free manual pilot	Chairman; SERVO drafts script	At least 2 say "I'd pay" and 1 pilot is agreed, otherwise kill it
Club and Coach Desk: landing page and Stripe link to 10 coaches; ask 2 associations to mail it	SERVO drafts the page; Chairman publishes and sends	At least 2 deposits, or an association agrees to send
Prep with no Chairman hours: classify the dementia kit items through HSA's tool	PROBE, COGSWORTH	SKU list classified

Decisions only you can make

- 1. **What S\$ per month is "steady income"?** Is a S\$1.5k to S\$3k stepping stone acceptable, or must your weekly hours rise?
- 2. **Do you want to run the hamper test on the 22 October clock?** It takes about a third of the next two weeks' hours.
- 3. **Which contacts can you open** (coaches, HR managers, tuition centre owners)? Does your employment contract allow a side business? Check it before any invoice.

Where the rest of this report sits. Part 2 is my full synthesis. Part 3 is the agenda. Parts 4 and 5 are every robot's Round 1 proposals and Round 2 challenges, unedited. Part 6 is the assumptions register and the decision log. The sign-off and your ratification block are on the last page.

2. Synthesis (Round 3)

Written by RIVET-CEO after reading all ten Round 1 and Round 2 files. Reproduced in full.

RIVET-CEO: full synthesis

2026-10-08. All S\$ figures are estimates unless a source is shown. Profit is before the Chairman's own time. No robot found any willingness-to-pay data (PROBE), so the decision is "run the cheapest tests first", not "go".

Recommendation: Ratify the shortlist below as a test list, not a launch list. Spend 14 days and S\$0 on three talk tests and a hamper demand test, then rank again on evidence.

1. Ranked shortlist

#	Idea (merged from)	Buyer	Partner channel	Profit/mo at m12, base / downside; breakeven (LEDGER est.)	Hrs/wk (COGSWORTH est.)
1	Centre Desk: WhatsApp enquiry-to-trial-booking front desk on a rented platform, client owns the account. Merges SERVO A, L3, COGS 5, PROBE C/D/E, vet recall. Tuition/enrichment goes first (no licence, no health data, largest base); groomers/vets second	Centre owner or admin	Tuition/enrichment associations, studio landlords (none verified)	S\$2.6k / S\$0.4k. S\$1.5k/mo from m4-6 base, never in downside	11 launch, 8.9 steady at 10 clients. Cap 12-13 clients
2	Club and Coach Desk: site + booking + Stripe, S\$500 + S\$49/mo. Merges CoachKit, L1, COGS 3, SERVO C/F/G, merch/awards as add-ons	Independent coach, club secretary	SportSG coach registry (6,100 coaches, sourced; list-sharing unverified), associations, gyms	S\$1.9k / S\$0.3k. m4-6 base	6 launch, 7.3 steady
3	CNY Gifting Desk: preorder only, sealed packs, packing outsourced. Merges L4, BEACON Agent-Gift, SERVO E, COGS 1, dried foods	HR/admin manager, SME 50-300 staff	Event planners, IFA firms (ERA/PropNex unverified)	S\$3.7k per season (not monthly) / S\$0.4k, before S\$300-1,500 insurance. BE: first season, only if deposits land	15.5 peak for 8 wks self-packed, 9.5 outsourced, about 7.5 yearly avg
4	Dementia home kit, non-device only (PROBE B)	Adult-child caregiver, day-care manager	Dementia Singapore, day-care centres. Memory clinics will not endorse	Not modelled by LEDGER. RIVET est. S\$1.6k (30 orders x S\$150 x 35%) / S\$0.4k. BE not modelled	9 launch, 8.1-9.3
5	Vet-Shelf: non-meat treats on consignment (old #3, L7, BEACON 5)	Vet practice manager, groomer	Mount Pleasant group (site count unverified), groomers	L7 proxy: S\$540 / S\$135. BE m5-6	about 5 (BEACON R1, COGS 7)
R1	PDPA pack as cosec/accountant add-on only	Pte Ltd founder via cosec	Cosecs, accountants	S\$0.6k / S\$0.04k. BE not modelled	7 launch, 4 steady
R2	Lead responder for aircon/cleaning/renovation (a Centre Desk vertical, promoted if tuition fails)	Owner-operator	Ads freelancers, trade associations	S\$2.6k / S\$0.4k. BE not modelled	about 4 (SERVO: 1 upkeep + 3 sales)

#	No-build test (SERVO)	Evidence (PROBE)	Backed by	Objections
1	Hand-send from the free WhatsApp Business app for 1 pilot client, 4 weeks; build later (25 h) on a rented platform	Tuition spend S\$1.8B (2023, stale). SchoolTracs bundles WhatsApp from S\$55/mo (vendor-written). Gap in enquiry front desk: unsourced	SERVO, PROBE, LEDGER, COGS	BEACON: bundled incumbents
2	Landing page + Stripe link to 10 coaches	6,100 coaches supported. Willingness to pay unproven vs Vibefam S\$89/mo and free tools	All five	LEDGER: partner supply is Fatal until an association mails the offer
3	Quote PDF to 10 HR buyers, 50% deposit, no stock	Box price claims contradict (S\$20-60 / S\$40-150 / S\$150-250). Margin unsourced	BEACON, SERVO, LEDGER, COGS	PROBE: no demand data. LEDGER: K7 veto below S\$80

#	No-build test (SERVO)	Evidence (PROBE)	Backed by	Objections
4	No build; run SKUs through HSA tool, 5 caregiver calls, 10-unit preorder of 1 SKU	Dementia 74k to 152k (MOH, projection). Willingness to pay thin; Dementia Singapore has own store; HCG grants	PROBE, COGS, SERVO, BEACON (conditional)	LEDGER: unsourced inventory risk. BEACON: K5 held if no introducer
5	Written AVS query; 20-unit consignment at 3 groomers	Pet-product growth slowed 2025 (secondary). AVS licence unconfirmed	BEACON	COGS and SERVO cut pet; no other backer
R1	Ask 3 cosecs to white-label	DPO prices sourced (\$\$100-500/mo)	BEACON, PROBE	LEDGER and SERVO: liability, \$S0.6k
R2	Chairman answers leads by hand for 2 firms, 2 weeks	Unsourced	LEDGER	SERVO: owners drop tools after 2 months

Slot 5 is the weakest (one backer). R1 has two but near-zero profit and liability. The Chairman may swap them.

2. Conflicts resolved

Conflict	Ruling
WhatsApp saturation	Clinics dead (free gov SMS, Bot MD, PDPA data). Reminders/attendance dead for tuition (SchoolTracs). Centre Desk survives only as an enquiry-to-trial front desk . Kill it if fewer than 2 of 5 centres lose enquiries today and would pay on top of their system
Who pays the platform	Client , on their own account. LEDGER's K6 veto stands if ROD pays (gross margin 12% / -5%). The talk test quotes the all-in \$S246-282/mo
Dementia and HSA	COGS withdrew the wall: non-electronic, non-monitoring kit, no treatment claims, is wellness. Trackers, alarms, dispensers excluded. Wander door-alarm status unconfirmed
Hamper margin	RIVET go-threshold (not a veto): \$S150+ per box. LEDGER's veto covers only boxes under \$S80. BEACON's \$S20-60 agent-gift variant is therefore out. 30-40% margin is unsourced until 3 packer quotes arrive

3. Vote table (each robot's top 5)

Final	BEACON	SERVO	PROBE	LEDGER	COGS
1 Centre Desk	killed	1	2	1	1 (+2 vets)
2 Club and Coach	3	3	4	2	3
3 Gifting	1	2	none	3	5
4 Dementia kit	5	5	1	none	4
5 Vet-Shelf	4	none	none	none	none
R1 PDPA	2	killed	3	killed	folded in
R2 Lead responder	none	none	none	4	none

Also voted, not shortlisted: Helper-Cycle (PROBE 5, LEDGER 5; BEACON conceded it), merch (SERVO 4, merged into #2).

4. Kills

Cut	Decisive reason
Clinic and GP recall	Free HAS/MOH SMS tools and Bot MD (PROBE conceded)
Helper-Cycle	MOM reminds employers; FIN/NRIC data barred
InvoiceNow	IRAS and vendors offer it free
Lead-gen, local SEO, directory, event platform	Disputes, crowded, K7 (LEDGER vetoes on 13, 15)
Pantry, dried-food import, monthly drop, gym gear	K6/K1 (15-25% margin, \$S530 profit, \$S10k+ stock)
Gift quote engine, coach reports, emissions pack, grant tool	Builds before demand, consulting hours, EDGE rules unknown

Old 02-ideas.md: #1, #5 (narrowed), #6 survived. #2 and #25 merged into #3, direct import died. #3 survived narrowed to #5. #7 survived as the non-device kit (BEACON, LEDGER, COGS cut it on HSA risk, which PROBE showed was overstated). #11 merged into #2, #12 into R1. #4, #8-10, #13-24 died.

5. Vetoes in force and remaining objections

Robot	Veto / block in force	Remaining objection
LEDGER	K6: ROD never pays the platform. K7: no hamper under S\$80	Dementia kit was never modelled. Partner supply for #2 unproven
SERVO	No self-hosted Meta API, no multi-tenant SaaS. Clinic recall blocked on data risk	Hamper peak hours. Client lists are often in notebooks, not clean digital data
PROBE	Evidence block: unsourced prices, conversions, margins stay labelled estimate	No demand evidence for #3. Willingness to pay unsupported everywhere
COGS	None used	Hamper only works with outsourced packing. Wander door-alarms unconfirmed
BEACON	K5 held in reserve against the dementia kit	Centre Desk has no wedge vs bundled incumbents. The S\$150 floor kills BEACON's own #1 variant (S\$20-60 agent gifts)

6. The income-ceiling problem

At 10 hrs/week, B2B services cap at **S\$1.7k/mo (COGS, 12-13 clients) to S\$3.2k/mo (LEDGER, 19-24 clients)** in the base case, and S\$1.2-1.6k in downside. Two products cannot both fit.

Plain answer against 01-constraints.md ("profit in 6 to 12 months"): the base case meets it (S\$1.5k/mo by month 4-6); the downside does not (S\$0.3-0.4k at month 12). **Neither replaces a salary.** It is a part-time supplement.

Option	Effect	Cost
Raise ROD's fee, e.g. S\$150 to S\$250	Cap about S\$3k+ at 12-13 clients	All-in becomes about S\$370 vs S\$55 incumbents. Works only where no incumbent exists (enquiry desk, home services)
Raise hours	Roughly doubles the cap at 20 hrs (RIVET est.)	Only the Chairman can change 01-constraints.md
Productize	Partners do onboarding, about 17 clients	Partners unproven. Multi-tenant software is vetoed
Stepping stone	S\$1.5-3k/mo bridge while a physical line (#3, #4, #5) grows without hours	Stock risk, lumpy

Recommendation: treat it as a stepping stone and price-first. Test both S\$150 and S\$250 ROD fees in the talk tests. Do not raise hours yet. Revisit at month 6 against actuals.

7. Time-critical: CNY 2027 hampers

CNY is 6 Feb 2027. **Decide by 22 Oct 2026; deposits by 14 Nov** (LEDGER, sourced). Base needs about 72 hrs of outreach in 5 weeks against 53 available. **Worth running only as a capped, zero-spend demand test** (about 7 hrs). Net math at S\$150 x 35%: 40 boxes leaves roughly S\$0-1.4k after PayNow (1.3%), S\$300 fixed and S\$300-1,500 insurance, which is the K7 trap. **Go on 22 Oct only if** at least 3 HR buyers commit to about 60 boxes at S\$150 or more, quotes show 30% margin, and a real insurance quote leaves a net season profit of S\$1,000 or more (RIVET threshold, estimate). Otherwise drop CNY and target Mid-Autumn 2027. Success is still a lumpy season, so it does not solve the ceiling.

8. Next 2 weeks (about 20 hrs)

Test	Owner	Done-when (by 21 Oct)
#3 Hamper: 10 HR asks, 3 packer quotes, insurance quote, SFA sealed-pack query	Chairman asks; COGS drafts script; LEDGER margin sheet	Written go/no-go against the 22 Oct gate (about 7 hrs)
#1 Centre Desk: 5 talk tests at the all-in price, offer 1 free manual pilot	Chairman; SERVO drafts script	At least 2 say "I'd pay"; 1 pilot agreed. Else kill
#2 Club and Coach: landing page + Stripe link to 10 coaches; ask 2 associations to mail it	SERVO drafts page, Chairman publishes and sends (3 hrs)	At least 2 deposits, or an association agrees to send
Prep, no Chairman hours: HSA classification of the dementia SKUs	PROBE, COGS	SKU list classified

Great debate. Now, what do we do on Monday? The Chairman starts the 10 HR asks.

9. For the Chairman

Path to profit (Centre Desk, estimate): S\$900 setup + S\$150/mo x 10 clients, minus about S\$13 Meta and tool cost per client, with client-paid platform; about S\$2.6k/mo at m12 base, S\$0.4k downside. **Assumptions:** A-003 to A-016 added.

Ratify the list as tests, or send back the slot 5 choice. Three decisions only they can make:

- 1. **What S\$ per month is "steady income"?** Is a S\$1.5-3k stepping stone acceptable, or must hours rise?
- 2. **Run the hamper test on the 22 Oct clock?** It takes about a third of the next two weeks' hours.
- 3. **Access:** which contacts (coaches, HR, tuition owners) can they open? Does their employment contract allow a side business (open question in 01-constraints.md)? Check before any invoice.

3. Meeting agenda

Agenda as issued

Date: 2026-10-08. Called by the Chairman (Caleb).

Question

What are the best business ideas for the Chairman to research deeply, starting from a clean slate? Output: a **ranked shortlist of 5 ideas** (plus 2 reserves) that survive attack from every robot.

Constraints (from 01-constraints.md, binding)

- Singapore market. Capital S\$5k to S\$20k. About 10 hrs/week. Profit within 6 to 12 months.
- Go-to-market via **partnerships** (resellers, referrers, channel partners). The Chairman has done direct outreach and vibecodes MVPs.
- Physical products are fine. Demand must be structural, not a fad.
- Seed ideas the Chairman mentioned: imported dried foods, pet food, website-builder / training app / consultancy for sports coaches.

Old list

02-ideas.md holds a gut-level list of 25 ideas from the first pass. It is **unresearched**. Treat it as input to judge, not as truth. Keep what is good, cut what is bad, say why.

Format (3 rounds, parallel within a round)

Files live in this folder. **Each robot writes only its own files** (parallel runs, so no shared file edits).

Round	Who	Writes	Does
1	PROBE, BEACON, SERVO, LEDGER, COGSWORTH (parallel)	r1-<robot>.md	Propose 6 to 8 fresh ideas from their own lens, then judge the old list
2	Same five (parallel)	r2-<robot>.md	Read everyone's Round 1. Attack, merge, back or kill ideas. Name your top 5
3	RIVET-CEO	synthesis.md	Ranked shortlist, dissent kept visible, questions for the Chairman

Idea card (required for every idea)

Field	Content
Name	Short
Buyer	A named role, not "people"
Offer + revenue model	What is sold, price range, one-off or recurring
Channel partners	At least 2 types in Singapore
Startup cost	Rough S\$, labeled estimate or sourced
Weekly hours	After launch
Why demand lasts	Structural driver
Biggest risk	The one thing most likely to kill it

Rules

Per company/PROTOCOL.md. Also:

- About 500 words max per file. Tables over prose.
- Numbers need a source URL and date, or the label "estimate".
- Web search is allowed and encouraged for current Singapore facts. Do not contact anyone or spend money.
- Round 2: agree only as "I tried to break X and couldn't, because <evidence>".

4. Round 1: proposals

Each robot proposed fresh ideas from its own lens, then judged the old idea list. Unedited.

PROBE-CRO: structural demand lens

PROBE-CRO: Proposal (Round 1)

Checked 2026-10-08. est. = my unsourced estimate. (G) government, (S) secondary, verify. **stale** = older than 12 months.

Fresh ideas

#	Name / Buyer	Offer + revenue (est.)	Partners	Startup / hrs	Why demand lasts (evidence)	Biggest risk
A	InvoiceNow setup / owner of a newly GST-registered micro-SME	Peppol onboarding; S\$300 + S\$30/mo	Corp secretaries, bookkeepers	S\$1k / 5	Law, phased: new voluntary registrants 1 Apr 2026, small existing firms 1 Apr 2028, all by 2031 (G) IRAS/gst-invoice requirement)	IRAS offers free InvoiceNow services to newly incorporated firms (G). Pool is small until 2028
B	Dementia-friendly home kit / adult-child caregiver, or day-care manager	Non-medical kits; S\$80-250 plus consumables	Memory clinics, day-care centres, physios	S\$5-8k / 6	Dementia 74k (2023) to 152k (2030) (G) MOH. Citizens 65+ 20.7% in 2025 (G). Caregiver grants rising (G) MOH	HSA may regulate alarms and monitors; consumers can buy online
C	Solo-tutor admin kit / freelance tutor or small tuition-centre owner	Attendance, invoicing, parent reports; S\$29-79/mo	Tutor agencies, centre associations	S\$1k / 5	Tuition spend S\$1.1B (2013), S\$1.4B (2018), S\$1.8B (2023); latest 5-yearly survey, stale but newest available (G) SingStat	Price-sensitive buyers; competitor scan not done
D	Recall engine for pet clinics and groomers / practice manager	WhatsApp rebook reminders; S\$49-99/mo	Vet groups, groomer chains	S\$1k / 5	111,000+ pet cats licensed by the 31 Aug 2026 deadline, a new countable base (G) NParks (count via (S) Malay Mail, 1 Sep 2026)	Vet software already ships reminders
E	Healthier SG GP recall / clinic manager	Same engine as D; S\$99-199/mo	GP groups	S\$1-2k / 6	700k+ enrolled, 1,100+ clinics, Mar 2024, stale (G) MOH	PDPA and health data; merge with D
F	Supplier emissions data pack / finance manager at an SME supplying listed firms	Scope 1/2 workbook, questionnaire answers; S\$800-2.5k/yr	Accountants, trade associations	S\$2k / 8	SGX Scope 3 from FY2026 (Oct 2024, stale) (S)	Reads as consulting (hours for money); pull may start 2028+
G	Coach site + booking (seed) / independent coach	S\$600 + S\$40/mo	Clubs, gyms	S\$1k / 6	Weekly sport participation over 70% in 2021, stale (G) SportSG	Coaches already use Instagram and WhatsApp; no willingness-to-pay data

Demand stability (K3): B strongest (structural, ageing). C structural (10-year rise). D and E structural base, commodity tooling. A and F structural but late (2028+). G unproven.

Verdicts on 02-ideas.md

Old #	Verdict	Reason
1	Keep, merge with G	Seed; test willingness to pay first
2, 25	Downgrade, hold	2025 F&B: 2,431 closures vs 3,357 openings, Jan-23 Oct, so net positive, but high churn (60%+ of closed outlets under 5 years) (S) search summary citing MTI/ACRA, source article not located: unverified . Credit risk in B2B
3	Keep, downgrade	AVS paperwork; pet-product growth slowed in 2025 (S) Euromonitor. Services (D) lower risk
5	Keep, merge into C, D, E	One engine, three verticals; talk test picks one
6	Hold: unsupported	No gifting-demand data gathered
7	Keep, narrow to B	Strongest driver; non-medical only
4, 8-15	Cut	No structural evidence found; crowded, low margin or slow
16-24	Agree with Drop	Nothing contradicts them

Evidence block: not used. **Cheap-test note:** B, C and D/E have enough evidence for a 5-conversation talk test now. Source? Date? Sample size? is still open on willingness to pay for every card.

BEACON-CMO: buyer and partner first lens

Lens: start from who is reachable through partners and what they already pay for, then back into a product. All \$\$ and hours are estimates unless a source is linked. Partner names verified by web search 2026-10-08 are marked (v).

Part 1: Fresh ideas (idea cards)

#	Name	Buyer	Offer + revenue	Channel partners (what they get)	Start-up	Hrs/wk	Why demand lasts	Biggest risk
1	CoachKit	Independent coach registered on NROC	Site + booking + PayNow reconciliation. S\$500 setup + S\$40/mo	SportSG National Registry of Coaches (v: 6,100+ coaches, 89 sports) and sport associations: free tool for members. Gyms/studios: coaches stay on-site	S\$1.5k	6	Coach registration is mandated for ActiveSG providers (v)	Coaches won't pay S\$40/mo vs free Linktree/Google
2	Helper-Cycle	Owner of a maid agency; second buyer: 6ME clinic	WhatsApp recall for employers: 6-monthly medical (MOM-mandated, v), renewals, insurance. S\$150/mo per agency	AEAS (v: 330+ agencies). 6ME clinics (repeat footfall). Insurers (policy renewals)	S\$2k	5	Legal 6-monthly cycle never ends	Agencies tiny and slow to pay. PDPA load on helper data
3	PDPA-Pack	Accounting-firm principal or Pte Ltd founder	Privacy policy, DPO appointment kit, annual review. S\$300 to 600/yr, white-label	Corp secs: Osome (v: only sells DPO via cosec, S\$100 appointment), Sleek (v), small accountants: new upsell and rev share	S\$1k	4	PDPA requires a DPO for every organisation (v)	Legal-adjacent liability. Cosecs may just build it
4	Agent-Gift Desk	Agency director or team admin of a property or insurance agent team	Branded client-gift hampers, per-gift S\$20 to 60 (sourced, patchandbagel guide). 4 gifting windows/yr	PropNex, ERA (well known, not checked here), IFA firms: they hand agents a perk. Event planners	S\$6k stock	8 peak, 2 off	Annual relationship gifting	Lumpy, 4 windows. SFA import per consignment (04-setup-costs)
5	Vet-Shelf	Practice manager at a vet group	Wholesale non-meat treats (dried veg/fruit) from scheduled countries, 35 to 45% margin	Mount Pleasant Veterinary Group (v, 9 clinics), independent clinics, groomers: retail margin without sourcing	S\$5k	5	Pet ownership is structural	Vets may already have a distributor. Shelf space
6	Grant-ready vertical tool	Studio or tuition-centre owner	Niche booking/ops tool sold as 50%-grant-funded	IMDA/EnterpriseS G pre-approval (v): PSG exists but merges into new EDGE grant in 2H 2026	S\$3k	6	SMEs buy when subsidised	Vendor-approval time and EDGE rules unknown. Park until clear

First-10 path (labeled estimate): #1 and #3 convert at roughly 5 to 15% of warm intros. Ten customers need about 80 to 150 intros, so the partner must send lists, not logos. #2 and #4: 1 agency or team yields 5 to 20 buyers if it works.

Part 2: Verdicts on 02-ideas.md

Old #	Verdict	Reason
1 sports-coach site	Keep, merged into CoachKit	Named registry gives a reachable list
5 clinic/tuition WhatsApp	Cut	ConnectLah and Bot MD already serve SG clinics (v)
6 + 2 gifting + dried foods	Keep, merge into Agent-Gift Desk	Named buyer, repeat
3 pet treats	Keep, narrow to Vet-Shelf	Needs vet shelf partner, non-meat only
7 eldercare distribution	Cut	SMF (v) subsidises listed devices only; no vendor path found; HSA risk
12 local SEO	Merge into PDPA-Pack as accountant upsell	Same channel
10, 11, 8/9, 13 to 15	Cut	No partner leverage or slow, low margin
4 builder/app, 16 to 24	Cut	Per old list reasons
25 B2B pantry	Merge into #4	Same hamper sourcing

Veto (K5): not used. #6 would fail K5 until EDGE vendor rules are published. I will refuse any idea whose first 10 buyers have no named introducer. *Who exactly buys this, and who introduces us to them?*

SERVO-CTO: build leverage lens

Lens: what Caleb can vibecode or assemble with no-code in under 40 hrs, run in under 2 hrs/week, and sell to a Singapore business. Default to off-the-shelf until someone pays.

Part 1: Fresh ideas (idea cards)

#	Name	Buyer	Offer + revenue	Channel partners	Startup (est.)	Build h / upkeep h per wk	Why demand lasts	Biggest risk
A	WhatsApp front desk for tuition, dance, music and enrichment centres	Centre owner / admin	S\$900 setup + S\$150/mo retainer; client pays own platform fee. FAQ, trial-class booking, renewal chasers	Tuition/enrichment associations, centre-software vendors, landlords of studio malls	S\$500 (est.)	25 / 1.5 (up to 5 clients)	Parents live on WhatsApp; admin staff cost rises	Platform margin and churn; Meta now bills service replies too (see sources)
B	60-second lead responder for aircon, cleaning, renovation firms	Owner-operator	S\$600 setup + S\$120/mo. Replies to ad/Carousel/web leads, collects photos, books a quote slot	Google Ads freelancers, supplier/wholesaler reps, trade associations	S\$300 (est.)	15 / 1	Lead-chasing is a daily pain; whoever replies first wins	Owners ignore the tool after 2 months
C	CoachKit : site + booking + Stripe in a box	Independent coach / small studio	S\$490 setup + S\$49/mo hosting and edits	Coaching bodies, gyms, sports shops	S\$300 (est.)	12 / 1	Coaches keep starting out; new ones need a presence	Local rival Vibefam from S\$89/mo, Acuity from US\$16. Wedge is price and "done for you" only
D	PDPA/DNC starter pack (AI-drafted policy, consent forms, breach checklist)	SME owner with no DPO	S\$199 one-off + S\$99/yr update. Not legal advice; positioned as templates	Corp secretaries, accountants, bookkeepers (referral fee)	S\$200 (est.)	15 / 0.5	Law is permanent; outsourced DPOs run S\$100 to S\$500/mo, so the cheap tier is open	Liability if a client is fined. Needs disclaimer and a lawyer's read
E	Gift quote engine : web form to auto-quote hampers by headcount, budget, date; supplier ships	HR / admin buyer	S\$30 to S\$80 per box at roughly 30% margin (est.), plus repeat annual orders	Event planners, HR consultancies, dried-food suppliers	S\$3k to S\$8k (est.)	20 / 3, lumpy	Corporate gifting recurs every year	Seasonal; supplier reliability. Tech removes admin, not stock risk
F	Name-engraved awards for clubs and schools, outsourced to a local engraver at first	Club secretary / teacher	S\$15 to S\$40 per piece; ordering page with live preview	Sports clubs, school CCAs, trophy shops	S\$500 to S\$1k (est.)	15 / 3	Annual awards cycle	Outsourced margin may be thin; own laser means HDB and ventilation issues
G	Coach progress reports : Claude turns session notes into client reports and plans	Personal trainer / running or swim coach	S\$59 to S\$99/mo per coach	Gyms, coach associations	S\$200 (est.)	20 / 1	Coaches sell on visible results	Willingness to pay. Trainerize-style apps exist

CTO ranking by buildability: B, A, C, G, D, F, E.

Tool costs for LEDGER (cited, currency unconfirmed): Wati from about 119/mo, SleekFlow Pro AI about 149/mo, Respond.io from 79/mo. Meta Singapore rates: utility and service about S\$0.02 per message, marketing about S\$0.09. [Sleekflow pricing](#), checked 2026-10-08. Studio software: [Vibefam](#), checked 2026-10-08. DPO prices: [SG Secretary Services](#), checked 2026-10-08.

Veto note: I veto building our own WhatsApp stack on the Meta API. Resell or configure a no-code platform. Also avoid clinics for A: patient data raises PDPA exposure, and clinics already have booking systems.

Watch, not a card: PSG pays up to 50% of pre-approved solutions but merges into EDGE in H2 2026, so the vendor-approval path is unclear ([Sleekflow PSG guide](#)). InvoiceNow setup is free from vendors until 2031, so no paid wedge.

Part 2: Verdicts on the old list (02-ideas.md)

Old #	Verdict	Reason
1 Coach website + booking	Merge into C/G	Right buyer, thin wedge. Add the AI report layer to differentiate
5 WhatsApp/AI for clinics and tuition	Keep, narrow into A and B	Drop clinics (PDPA health data)
6 Corporate gifting	Keep, merge with E	Tech quote engine is the edge
2 Dried foods, 25 Pantry staples	Merge into E	Dried food becomes a gift SKU, not a store
11 Uniforms/merch	Merge into F	Same school/club buyer
14 Home-services leads	Merge into B	Sell the responder tool, not disputed leads
4 Website builder app, 13 Directory, 15 Event platform	Cut	Saturated or slow, and AI makes building cheap for everyone
12 Local SEO, 16 Templates, 21 VA agency	Cut	Crowded or time-for-money
3 Pet food, 7 Eldercare	Cut from my lens	No tech edge, heavy regulation. COGSWORTH to judge

Nothing is "just" anything. Who maintains it at 2am? Every digital card above stays at 1 to 1.5 hrs/week only because the platform is rented, not built.

LEDGER-CFO: cash-first lens

Lens: margin, low capital, deposits/retainers before costs. All profit figures are **estimate** unless sourced; profit is before the Chairman's own time. BE = breakeven month.

Part 1: Fresh ideas

#	Name / Buyer	Offer + model	Partners	Startup (est)	Hrs/wk	Why lasts	Biggest risk
L1	Coach site + booking / solo coach, studio owner	S\$1,200 setup (50% deposit) + S\$99/mo care plan	Coach associations, gyms	S\$500	4	Every coach needs bookings	Freelancer price war
L2	Clinic recall + no-show WhatsApp / GP/dental/physio practice manager	S\$800 setup + S\$199/mo	Clinic groups, practice-software resellers	S\$600	5	Missed appointments cost clinics money	WhatsApp API rules, PDPA, clinic IT lock-in
L3	Fee-chase + renewal bot / tuition, enrichment, yoga-studio owner	S\$600 setup + S\$129/mo	Tuition associations, studio landlords	S\$600	4	Late fees and lapsed members are chronic	Owners use free WhatsApp manually
L4	Corporate hamper, preorder only / HR/admin buyer	S\$150-250 box, 50% deposit, buy stock after cutoff	Event planners, HR groups	S\$1,500	6 (seasonal)	Annual gifting budgets	Lumpy, 3 windows a year; SFA/insurance
L5	Monthly dried-food group-buy drop / office WhatsApp communities	Preorder S\$45 basket, ship one batch per month	Coworking spaces, office admins	S\$2,000	4	Repeat snacking	Per-shipment SFA permit and TradeNet cost
L6	Team merch preorders / school CCA, club treasurer	Collect 50% deposit, dropship supplier	Schools, sports clubs	S\$800	5	Fixed annual calendar	Design/admin eats hours
L7	Prepaid pet-treat 3-month plan / owner via groomer	S\$90 per 3 months, non-meat only	Groomers, vets	S\$3,000	3	Pets are consumable repeat	AVS paperwork if meat; thin repeat

Unit economics (base vs downside, monthly profit)

#	Key inputs	Base	Downside	BE month
L1	2 setups/mo + 10 plans; tools S\$250	S\$2,500	S\$800 (0.5 setup/mo, 4 plans)	2
L2	8 clients, 1 new setup/mo; WhatsApp ~400 msgs x S\$0.016 each; tools S\$150	S\$2,100	S\$500 (3 clients)	3
L3	10 clients, 1 setup/mo; tools S\$200	S\$1,700	S\$200 (3 clients)	3-4
L4	80 boxes x S\$180 x 40% margin = per season	S\$5,700/season	S\$900/season (20 boxes, 30%)	4-5 (CNY)
L5	40 orders x S\$45 x 35%, less ~S\$100 permit/shipment	S\$530	S\$100	3-4
L6	3 orders x S\$1,500 x 30%	S\$1,350	S\$250	2
L7	40 subs x S\$30/mo x 45%	S\$540	S\$135	5-6

Sourced: WhatsApp SG utility S\$0.016, marketing S\$0.0732 per message ([Sleekflow](#), checked 2026-10-08; service replies chargeable from 1 Oct 2026). Stripe PayNow 1.3% ([WorldFirst](#), 2026-10-08). Website maintenance S\$80-250/mo, hosting S\$20-70/mo ([Maple Tree Media](#), 2026-10-08). CNY hampers S\$128-568, order 10-12 weeks ahead ([EasyParcel](#), [Patch and Bagel](#), 2026-10-08). 1,095 GP clinics ([Malay Mail, Feb 2026](#)); about 718 MOE tuition centres, 2022 data, needs re-check.

Timing flag: L4 must start now. A CNY order window needs ordering about 10-12 weeks ahead, so deposits must be taken in the next few weeks.

Part 2: Verdicts on 02-ideas.md

Old #	Verdict	Reason
1 coach site	Keep (= L1)	Deposit upfront, 80%+ margin
5 clinic/tuition automation	Keep, split into L2 and L3	Different buyers and WhatsApp costs
6 hampers	Keep , preorder-only (= L4)	Deposit funds stock
2 dried foods	Merge into L4 and L5	No retail; B2B and preorder only
3 pet food	Keep, conditional (= L7)	Non-meat only
12 local SEO	Merge into L1/L2 as add-on	Standalone is crowded
11 uniforms	Merge into L6	Same idea
4 builder/app	Cut	Merges into #1
7 eldercare	Cut	Inventory S\$10k+ first, HSA risk, payback past 12 months
8 tea/coffee	Cut	Nespresso-type competition, thin margin
9 pantry sub	VETO K6	Gross margin about 15-20% (estimate), under 30%
10 gym gear	VETO K1/K7	Sole-distributor stock about S\$10k+ before first sale
13 directory	VETO K7	No revenue until audience exists, 6+ months
14 lead gen	Cut	Disputes, chargebacks
15 event platform	VETO K7	Long sales cycle, seasonal
25 pantry staples	VETO K6	Distributor margin about 15-25% (estimate), per-shipment permits

My top 3: L1, L2, L3. All have a deposit, a recurring fee, near-zero cost of goods and breakeven by month 2-4. Base-case profit is S\$1.7k-2.5k per month. Show me the unit economics or show me the door.

COGSWORTH-COO: operations-first lens

*Lens: legal, simple fulfilment, low support, fits 10 hrs/wk. All costs and hours are **estimates** unless a source is shown. Facts checked 2026-10-08.*

Part 1: Fresh ideas

Common to all: sole prop first (S\$115, per 04-setup-costs.md). Any idea that collects customer data also needs a DPO named (free form, PDPC): [pdpc.gov.sg/dpo](#). That is paperwork, not a blocker.

#	Idea (buyer)	Offer + revenue	Partners	Start-up	Weekly hrs (avg, after launch)	Licence	Why lasts / Biggest risk
1	Sealed-pack hampers (HR/admin manager, SME 50-300 staff)	Curated hampers from local SFA-registered distributors, S\$40-150, 3-4 gifting windows	Hamper packers, event planners, local dried-food distributors	S\$1-3k	Outreach 3, sourcing 1, order admin 1.5, delivery booking 1, billing/support 0.5 = 7 (peak ~15 for 6 weeks: that is the K2 flag)	None if packs stay sealed (confirm with SFA). Repacking needs a licensed premises: SFA fined a dried-food supplier S\$2,500 in 2024 (SFA)	Annual gifting budgets / Lumpy peak, outsource packing
2	Direct-import dried food, B2B (cafe or hamper-maker purchaser)	Import 1 pallet, resell cartons; S\$300-2k orders, reorders	Cafes, hamper makers, grocers	S\$5-10k stock	Ordering 1, permit per shipment 1, outreach 2, delivery 2, invoicing 1 = 7	Form and a fee, not a blocker: SFA registration via GoBusiness, no annual fee, 1 working day; then TradeNet permit per shipment (GoBusiness /registration-to-import-processed-food-products-and-food-appliances), Customs). Excludes meat/fish	Repeat pantry need / Shelf life, stock cash
3	Productized coach/studio website + booking (studio owner)	S\$600-1,500 setup + S\$40-80/mo hosting	Coaching associations, gyms, sports shops	<S\$500	Outreach 3, build 1.5, support 1, billing 0.5 = 6	None	Recurring fee / Support creep
4	Studio consumables subscription (gym/studio manager)	Towels, cups, bags, bought locally and dropped by supplier; monthly S\$150-600	Gyms, physios, coworking	S\$1k	Outreach 2, reorder admin 1, supplier chasing 1, billing 0.5 = 4.5	None. Avoid antiseptic/health claims (HSA)	Reorder / Thin margin, price shopping
5	Booking and reminder automation, non-clinical (tuition-centre or salon owner)	S\$500 setup + S\$80-150/mo	Tuition associations, salon suppliers	S\$500	Outreach 3, setup 1, support 1.5, billing 0.5 = 6	None; PDPA consent + DPO. WhatsApp API per-message cost (estimate, unverified)	Missed-booking pain / Support at odd hours
6	Co-branded merch via local printer drop-ship (club or school admin)	Supplier prints, packs, delivers; 25-35% markup	Schools, sports clubs, event planners	S\$0-1k	Quotes 2, order proof-check 1.5, chasing 1, billing 0.5 = 5	None	Annual reorder / Proof-and-deadline disputes
7	Pet accessories white-label (vet/groomer manager)	Non-food, non-electrical items, S\$200-800/order	Vets, groomers, pet cafes	S\$3-5k	Sourcing 1, outreach 2, delivery 1.5, returns 0.5 = 5	Pet-shop licence is for live animals (GoBusiness /Licence-for-Pet-Shop)). Accessories-only unconfirmed ; ask AVS. Skip electrical items (Enterprise SG CPS) (source)	Pet ownership / Cheap Shopee substitutes

My top 3 on operations: #3, #6, #1 (if kept sealed). #2 is the margin upgrade once #1 has buyers.

Part 2: Old list verdicts (02-ideas.md)

Old #	Verdict	Reason
1	Keep	No licence, fits hours; same as my #3
2	Merge into #6/#25	B2B only; paperwork is a form, but add repack warning
3	Cut (reserve)	Meat needs AVS dossier; non-meat commercial import still needs NParks/AVS licence per 04, unconfirmed
4	Cut	Wix territory; folded into #1
5	Keep, narrowed	Drop clinics: health data plus PDPA burden. Tuition and salons only
6	Keep	Peak weeks breach 10 hrs; outsource packing
7	Cut	HSA wholesaler licence needs GDPMDS or ISO 13485 (search summary-pub.pdf): impractical, not a form. Non-device items only
8, 9	Cut / Merge	Delivery-heavy; tea folds into hampers
10, 14, 15, 12, 13	Cut	Exclusivity inventory, dispute load, seasonal, crowded, slow
11	Merge into my #6	Same loop, with admin limits
16-24	Agree drop	Particularly 21 (hours) and 18 (HSA)
25	Merge into #2	

Blind-spot check: only #7 (medical devices) and repacking are true walls. Everything else here is a form and a fee.

5. Round 2: cross-challenge

Each robot read all five Round 1 files and attacked, merged, backed or killed ideas. Unedited.

PROBE-CRO

PROBE-CRO: Challenge (Round 2)

Checked 2026-10-08. "Unsupported" = no source found, not proven false.

Claim audit

Claim	Robot	Verdict	Source + date
ConnectLah and Bot MD serve SG clinics	BEACON	Bot MD: Supported (NEMG case). ConnectLah: Unsupported as "already serves". Listing says "launched 5mo ago", 0 reviews, no client count	Product Hunt ; Bot MD
Clinic recall is an open gap (L2, my E)	LEDGER, PROBE	Contradicted (I concede E). Free HAS "Queue" SMS tool, MOH-approved gov.sg SMS for Healthier SG outreach, plus the two above	ask.gov.sg
Tuition WhatsApp is a gap	SERVO, LEDGER, COGSWORTH	Partly contradicted. SchoolTracs from S\$55/mo/branch, Edulabs S\$300/mo, ClassRec free tier, Schooli does attendance via WhatsApp. Gap only for an inbound-enquiry and trial-booking front desk: no source shows any vendor offers it	SchoolTracs, 23 Jul 2026 (vendor-written, biased)
Eldercare "HSA risk" (cut by LEDGER, BEACON, COGSWORTH)	all three	Overstated. HSA regulates by intended use: monitoring body functions is a device, general-wellbeing items are not. Wholesaler licence applies to devices only	HSA
SMF subsidises listed devices only	BEACON	Supported, and means-tested (income cap S\$2,000 per person)	AIC/HealthHub
Eldercare inventory "S\$10k+"	LEDGER	Unsupported, no source or SKU list	none
Meta bills service replies from 1 Oct 2026; 1,000 free/month	SERVO, LEDGER	Supported	Sleekflow, 2026-10-08
WA rates: utility S\$0.016 vs ~S\$0.02; marketing S\$0.0732 vs S\$0.09	LEDGER vs SERVO	Conflict, currency unconfirmed (Meta bills in USD). Immaterial (under S\$10/mo)	same
Hamper unit price: S\$20-60 (BEACON), S\$40-150 (COGSWORTH), S\$150-250 (LEDGER)	three	Contradicted among themselves. Hamper margin 30-40% is unsourced; about 468 SG firms in the gifts-wholesale SSIC code	Straits Data
6,100 coaches on NROC	BEACON	Supported	SportSG
6-monthly helper medical is mandatory	BEACON	Supported	MOM
Dementia 74k to 152k	PROBE	Supported (MOH, 4 Nov 2025). Projection, not a count	MOH
718 MOE tuition centres	LEDGER	Unsupported and stale (2022)	none
Any willingness-to-pay or conversion rate (5-15% intro-to-sale; S\$40-150/mo prices)	BEACON, SERVO, LEDGER, mine	Unsupported. All are estimates	none

Attack on the promising ideas

Idea	Assumption	Severity	Cheapest test
Dementia kit (mine)	Caregivers pay S\$80-250 for non-device kits when Dementia Singapore has its own retail store and caregivers get cash grants (HCG up to S\$600/mo from Apr 2026, means-tested)	Major	Call 5 day-care centres and memory clinics. Preorder 10 units of one SKU
Tuition/enrichment front desk	Centres pay S\$150/mo on top of a S\$55 system	Major	5 talk tests: do they lose enquiries on WhatsApp today?
PDPA pack	SMEs buy S\$199 templates; liability stays low	Major	Ask 3 cosecs if they would refer, and what they charge now (DPO S\$100-500/mo, SG Secretary Services)
CoachKit	Coaches pay S\$40-99/mo vs Vibefam from S\$89	Major	Show a mock site to 5 NROC coaches
Helper-Cycle	Agencies pay S\$150/mo and share helper data under PDPA	Major	3 agency calls
CNY hampers (L4)	80 boxes sold by 10-12 week lead time	Fatal if no buyers by mid-Nov	Ask 10 HR contacts for a deposit before any stock

Merges

- Coach site (G), CoachKit, L1, COGSWORTH 3 and SERVO G are one idea.
- PDPA-Pack and SERVO D are one idea.
- Tuition (C, SERVO A, L3, COGSWORTH 5) is one idea. Clinics (E, L2) are dropped.
- Hampers, dried food, pantry and merch (BEACON 4, SERVO E and F, L4 to L6, COGSWORTH 1, 2 and 6) are one idea family.

Top 5 (my ranking)

- 1. **Dementia non-device kit**, narrowed. Structural driver, no regulatory wall. I concede the evidence is thin on willingness to pay.
- 2. **Tuition and enrichment front desk**, bundled with admin.
- 3. **PDPA starter pack** via cosecs. A permanent legal duty and sourced competitor prices.
- 4. **CoachKit**, merged. The reachable list exists (6,100).
- 5. **Helper-Cycle**, as a reserve.

Kill: clinic recall (E, L2) is contradicted by free government tools. InvoiceNow (A) is contradicted by IRAS's free service, so I withdraw it. F is time-for-money. L5 and the pantry ideas fail on margin.

I tried to break COGSWORTH's "repacking needs a licence" and couldn't, because SFA fined a dried-food supplier S\$2,500 in 2024.

Demand stability: the dementia, tuition, PDPA and 6ME drivers are structural. Coaching willingness to pay is unproven. Hampers are structural but lumpy and crowded.

Veto / evidence blocks: K3 not used. Evidence block: the unsourced willingness-to-pay figures and the hamper margin and price figures should not be treated as fact until they are sourced or labelled "estimate". Source? Date? Sample size?

BEACON-CMO

Checked 2026-10-08. Conversion figures are labeled estimates (my blind spot: I have widened every range downward). "(v)" = web-verified today.

Conflicts resolved first

Conflict	Verdict
(a) WhatsApp for clinics/tuition/pet clinics	I concede the stronger version of my own point: it covers tuition too, not just clinics. SchoolTracs bundles WhatsApp in every plan from S\$55/mo per branch (v: schooltracs.com/sg). ConnectLah and Bot MD serve clinics (v). MOH's Health Appointment System sends free approved SMS for Healthier SG recall (v: ask.gov.sg). SERVO A, LEDGER L2/L3, PROBE C/D/E have no wedge below S\$55/mo. Kill as products.
(b) Dementia kit channel	A channel exists but is weak. Dementia Singapore (6 care centres, 3P caregiver partnerships, v) lists existing suppliers, mostly medical-device distributors (v). Memory clinics are public hospitals (TTSH, IMH) that will not endorse products. Reserve, not top 5.
(c) Cash-first vs partner-first	Overlap is large: LEDGER L4 = my Agent-Gift Desk = SERVO E = COGSWORTH #1. LEDGER L1 = CoachKit = SERVO C = COGS #3. LEDGER L6 = COGS #6 = SERVO F. Merge below.

Attack table (most promising ideas, any robot)

Idea	Assumption	Severity	Cheapest test
Gifting desk (L4/E/#1/mine)	Buyers pick a newcomer over Eu Yan Sang or The Gift Expert (claims 3,000 SME clients, vendor figure, v)	Major (no wedge yet)	5 HR/admin asks: "what would make you switch?" Plus a quote page taking 50% deposits
PDPA-Pack (mine, SERVO D)	Cosecs/accountants resell instead of building their own	Major	Show 5 accountants a sample pack, ask for resale at S\$300
CoachKit (4 robots)	Coaches pay vs Vibefam S\$89/mo, Acuity US\$16, free Linktree	Major	5 coaches: offer S\$490 and S\$1,200 variants, ask for a deposit
Vet-Shelf (mine, L7, COGS 7)	Vets lack a distributor; AVS licence not needed for non-meat	Major	Ask AVS in writing; ask 3 groomers for a 20-unit consignment
Dementia kit (PROBE B)	Day-care managers buy outside their approved supplier list; no HSA issue	Major, near Fatal for K7	3 caregiver interviews via Dementia Singapore programme
Helper-Cycle (mine)	Employers need reminders	Fatal, I concede. MOM posts the 6ME letter and has an eService (v); DoctorAnywhere sells 6ME (v)	None. Kill

Buyer + partner path

Idea	Buyer	Partners (what they get)	First-10 route, conversion (estimate)
Gifting desk	HR/admin manager, SME 50-300 staff	Event planners (referral fee), ERA/PropNex (ERA runs an Extra Mile points scheme redeemable on corporate merchandise, v, 2019, stale ; no gifting perk found), IFA firms	150 warm intros at 3-8% = 5-12 quotes won. Needs deposits by late Nov for CNY 2027 (~6 Feb, est.)
PDPA-Pack	Pte Ltd founder, via cosec	Osome sells DPO appointment at S\$100 (v); small accountants get S\$100-150 margin per pack	5 accountants, 1-2 agree (20-40%), each pushes to 5-15% of 40-100 clients = 10 sales
CoachKit	Independent coach on NROC (6,100+, v)	Sport associations, gyms (free member perk)	100-150 intros at 3-8%. List must come from partner; not public (unverified)
Vet-Shelf	Practice manager / groomer	Mount Pleasant (6 sites seen in search, my "9" unverified), groomers	10-25% accept free consignment; sell-through is the risk

Merges

Merge	Content
M1 Corporate Gifting Desk	Agent-Gift Desk + L4 + E quote form + COGS #1 sealed packs. Preorder, 50% deposit, supplier packs. LEDGER's deposits plus my partner list
M2 Club and Coach Desk	CoachKit + coach reports (SERVO G) as add-on + L6/F/COGS6 merch and awards. One buyer set (clubs, coaches) and one partner set
M3 Accountant channel	PDPA-Pack + local SEO add-on, sold only through cosecs/accountants

Pushback on LEDGER and COGSWORTH

- LEDGER's top 3 (L1, L2, L3) include two products with bundled incumbents at S\$55/mo. Cash-first still needs a reason to buy. Her downside case for L4 (20 boxes) equals one mid-size client; that is too harsh when a vendor claims about 330 gifts per business (1M gifts / 3,000 firms, v, vendor figure). Her pantry K6 vetoes are right; I concede.
- COGSWORTH flags 15 hrs for 6 weeks as K2 risk. Averaged over a year it is about 7 hrs/week, which passes. Her repack warning stands.

My TOP 5

- 1. **M1 Corporate Gifting Desk.** Only idea with a hard deadline and deposits. Start now.
- 2. **M3 PDPA-Pack via accountants.** Permanent law, open cheap tier (DPO S\$150-600/mo, v), named partners.
- 3. **M2 Club and Coach Desk.** Four robots converged; run price test.
- 4. **Vet-Shelf consignment trial.** Cheapest physical test.
- 5. **Dementia kit (PROBE B), conditional.** Strongest K3; keep only if Dementia Singapore grants 3 interviews.

Kill: WhatsApp clinic/tuition/pet-clinic products (bundled incumbents), Helper-Cycle (MOM already reminds), my grant-ready tool (EDGE rules unknown), InvoiceNow (free until 2031).

K5 veto: not used. Held in reserve against the dementia kit if no named introducer appears.

SERVO-CTO

SERVO-CTO: Challenge (Round 2)

Nothing is "just" anything. Who maintains it at 2am? Hours and upkeep are estimates unless sourced. WhatsApp facts checked 2026-10-08.

WhatsApp reality check (conflict a)

Rule	Fact	Consequence
Business verification	Meta: typically 1 to 3 business days; 3 to 5 days end-to-end via a BSP (Hyperleap)	Delay is the client's documents and Facebook Business Manager access, 2 to 3 hrs chasing per client (est.)
Templates	Review minutes to 24 hrs (Meta docs). Appointment reminders are Utility; "come back and rebook" nudges are Marketing	Recall wording decides the price tier and approval risk
Cost per message (SG)	Utility S\$0.016, marketing S\$0.0732; service replies chargeable from 1 Oct 2026 (Sleekflow). Another source shows S\$0.0205 and S\$0.0937 before GST (ChatMaxima). Discrepancy unresolved	400 messages a month is under S\$30 per client. Meta fees are not the cost.
Platform seat	Wati, Respond.io and Sleekflow run about 79 to 149/mo (R1, currency unconfirmed)	A S\$150 retainer plus a client-paid seat makes S\$250+ a month. Too dear for solo tutors.
Limits and consent	250 contacts per 24 hrs until verified, 1,000 after. Opt-in is required. DNC and PDPA consent for marketing messages: verify with PDPC	Fine at this scale. Consent logging is a build task.

Can the Chairman run it on a rented no-code platform? Yes, for up to about 5 to 10 clients, if each client owns its own WhatsApp Business account and the Chairman only configures it. No, if the Chairman hosts the Meta API or builds a multi-tenant app.

Attack table (top ideas from any robot)

Idea	Assumption	Sev	Cheapest test (no build)
Recall engine (SERVO A, CFO L3, COO 5, PROBE D)	The client's customer list and dates are clean and digital. They are usually in a notebook or a vendor's system. I tried to break "owners will pay S\$150/mo" and could not, but I have no evidence it holds.	Major	Chairman sends reminders by hand from the free WhatsApp Business app for 1 pilot client for 4 weeks. Count rebookings.
Clinic recall (CFO L2, PROBE E)	Clinics will let an outsider near patient data	Fatal	None. Park it until a non-clinical vertical pays.
CoachKit (all five robots)	Coaches pay S\$40 to 49/mo against free Linktree and a rival from S\$89/mo	Major	A one-page landing page with a Stripe payment link, sent to 10 coaches on the registry. Count deposits.
Hamper preorder (CFO L4, BEACON Agent-Gift, COO 1)	Buyers commit before the CNY window closes. Ordering is 10 to 12 weeks ahead (CFO), so the window is now.	Major	A quote PDF sent to 10 HR contacts. Take a 50% deposit before buying stock.
PDPA-Pack (my D, BEACON PDPA-Pack)	AI-drafted templates are safe to sell as a product	Fatal	I concede. It needs a lawyer's read (est. S\$500 to 1,500) and carries fine liability. Ask 3 cosecs whether they would resell it before anything else.
Lead responder (my B)	Owners reply through a tool, not their own WhatsApp number	Major	Chairman answers leads by hand for 2 firms for 2 weeks with a script.

Build hours vs the 10 hrs/week cap

Idea	Build (h)	Per-client onboarding (h)	Upkeep at 5 clients (h/wk)	Sales (h/wk)	Fits cap?
Recall engine, one vertical	25 (sheet, 4 templates, consent text, DPO form)	5	2 (4 at 10 clients)	3 to 4	Yes to about 10 clients. My R1 figure of 1.5h was too low once support is counted.
CoachKit	8 (template site)	5	1 (3 at 15)	3	Yes, but edit requests grow with every client
Hamper	4 (quote sheet)	n/a	3 average, 15 for 6 weeks	3	Peak breaches K2 unless packing is outsourced
Lead responder	15	4	1	3	Yes. Retention is the problem.

Merges

Merge	Result	One platform?
Recall engine = SERVO A + CFO L2/L3 + PROBE D/E + COO 5 + BEACON Helper-Cycle	Core is the same: a contact sheet, a date field, a template and an opt-in log. Only the wording and consent text change between tuition, groomers, maid agencies and coaches' pack renewals.	Reuse one set of templates and sheets. Do not build multi-tenant software. Pick ONE vertical by talk test. Maid agencies add helper medical data and FINs, so they come last.
Hampers = CFO L4 + BEACON Agent-Gift + COO 1 + SERVO E	One preorder project	Zero build. Drop my quote engine.
Merch = CFO L6 + COO 6 + SERVO F	One drop-ship offer	Zero build

TOP 5 (any robot's)

- 1. **Recall engine, one vertical**, tuition or pet groomers. It is the only recurring revenue that shares one core.
- 2. **Hamper preorder**, sealed packs only. Zero build and time-critical. I could not break the idea, but peak hours are the risk.
- 3. **CoachKit as the entry offer**, with recall as the upsell. Cheapest test, thinnest wedge.
- 4. **Merch and awards drop-ship**. Zero build, with an annual cycle.
- 5. **Dementia home kit (PROBE B)**. The strongest structural driver on the board, and it needs no build from me. Condition: non-medical items only, and a memory-clinic talk test first.

Kill: my PDPA/DNC pack (liability), my coach progress reports and gift quote engine (building before demand), standalone Helper-Cycle (health data, tiny agencies), InvoiceNow setup (free from IRAS and vendors, as I noted in R1), clinic recall for now.

Veto: used narrowly. I veto a self-hosted Meta API stack and any multi-tenant SaaS. No idea is vetoed outright. Clinic recall is blocked on data risk, not on build skill.

LEDGER-CFO

LEDGER-CFO: Challenge (Round 2)

Same assumptions for all six. Model: 43 hrs/mo x 85% productive, 0.5 hr per partner intro, 1-month sales lag, partner intros capped (base 40/mo, downside 15/mo), referral fee 10-25% of year-1 revenue. Price, conversion, churn and intro supply are estimate unless marked. Profit is before the Chairman's pay.

Unit economics, base / downside

Idea (merged source)	Setup + monthly	Win rate (est)	Clients m3 / m6 / m12	Chairman hrs per win	Cash CAC per win	Tool + pay cost per client/mo	Profit m12
CoachKit (BEACON1, SERVO C, L1)	\$500 + \$49	8% / 3%	4/13/26 vs 0.6/1.8/3.5	10 / 21	\$163	\$8 hosting (est)	\$1.9k / \$0.3k
Tuition WhatsApp desk (SERVO A, L3, COGS5)	\$900 + \$150	6% / 2%	3/9/15 vs 0.4/1.2/2.3	14 / 31	\$405	\$13 Meta (600 msgs x \$0.0205, chatmaxima 2026-10-08)	\$2.6k / \$0.4k
Lead responder (SERVO B)	\$600 + \$120	6% / 2.5%	3/9/17 vs 0.5/1.4/2.5	12 / 24	\$204	\$7 Meta	\$2.6k / \$0.4k
Helper-Cycle (BEACON2)	\$0 + \$150	5% / 2%	3/8/17 vs 0.4/1.1/2.2	13 / 28	\$270	\$6 Meta	\$1.9k / \$0.2k
PDPA-Pack (BEACON3, SERVO D)	\$199 + \$99/yr	10% / 3%	5/15/29 vs 0.6/1.5/2.4	6 / 18	\$74	\$3 (est)	\$0.6k / \$0.04k
Corporate hamper, CNY only (L4, BEACON4, SERVO E, COGS1)	\$150/box, 80 boxes, 35% GM, 1.3% PayNow (sourced)	4% / 1.5% of contacts	5 orders vs 2	14 / 27	about \$36 (samples)	\$300 fixed + \$300-1,500/yr insurance (04)	\$3.7k season / \$0.4k

Attack table

Assumption	Severity	Why	Cheapest test
BEACON: 5-15% warm-intro conversion	Major, Fatal below 3%	Unsourced. At 2-3% the Chairman needs 330+ intros per 10 clients, so 1-3 clients by month 12 (downside rows)	20 partner-warm intros asking a \$100 deposit
BEACON: SportSG NROC (6,100 coaches) is a channel	Fatal for CoachKit supply	A registry is not a referral list; no evidence SportSG shares it	Ask 2 associations to mail a member offer
SERVO: client pays own platform	Major	Client all-in \$246-282/mo (\$119 Wati-class tool, Sleekflow). If ROD pays instead, gross margin is 12% / -5% / 17%	Quote all-in price in the talk test
SERVO: 1-1.5 hrs/wk for up to 5 clients	Major	Support scales per client (1.5 hrs/client/mo); 15 clients eat half the cap	Log hours on 2 pilot clients
Meta rates	Minor	Service replies billed from 1 Oct 2026. My \$0.016 was low; \$0.0205 utility, \$0.0937 marketing is current	None
Hamper price \$30-80 (SERVO, BEACON) vs \$150-250 (mine)	Fatal at \$55	80 boxes x \$55 x 30% leaves \$963 before insurance	3 supplier quotes plus 5 HR buyers' per-head budget
My L1: \$1,200 + \$99/mo	Major, conceded	Vibefam is from \$89/mo with software. Use \$500 + \$49	n/a
"Breakeven month 2-3" (mine and RIVET-style)	Minor	Cumulative breakeven is trivial with \$40-60 fixed cost. \$1.5k/mo profit arrives month 4-6 base, never in downside	Track profit, not breakeven

CNY 2027 deadline. CNY is Sat 6 Feb 2027 ([source](#)). Order 10-12 weeks ahead: **14 Nov (12 wks) to 28 Nov (10 wks, latest)**. Deposits must be in by 14 Nov, so the go/no-go is needed by **22 Oct 2026**. Base needs about 72 hrs of outreach in 5 weeks, which is already above the 53 hrs the cap allows. Without a decision by 22 Oct, drop CNY and aim for Mid-Autumn 2027.

Cap on B2B clients (hours-only ceiling). Service products fill 10 hrs/wk at about 19-24 clients (CoachKit 45, PDPA 58). Steady profit is \$2.3-3.2k/mo base and \$1.2-1.6k downside (PDPA \$0.3-0.8k). The ceiling is hours, not demand. Two products cannot both fit under 10 hrs. \$2-3k/mo is a part-time wage, not "steady income", unless price per client rises or a partner does onboarding.

Merges

- Tuition desk, Lead responder and Helper-Cycle become one WhatsApp engine; the talk test picks the vertical.
- CoachKit absorbs SERVO G report add-on and COGSWORTH #3.
- Hamper, dried-food and gift-engine cards become one preorder-only CNY pilot, sealed packs only.

Top 5

- 1. WhatsApp engine, tuition/enrichment first: best base ceiling and margin, but only if the client pays the platform.
- 2. CoachKit at S\$500 + S\$49: lowest cash, but partner supply unproven.
- 3. CNY hamper pilot: S\$3.7k base, only if the 22 Oct decision is made.
- 4. Lead responder: highest base profit, but SERVO's own churn risk.
- 5. Helper-Cycle: AEAS gives a named list of 330 agencies, but breakeven is slow (month 11 to S\$1.5k).

Kill: PDPA-Pack standalone. Base profit S\$0.6k at m12, S\$0.04k downside, 25% referral leakage, plus legal liability. Keep only as a cosec add-on.

Veto: K6 used on any variant where ROD pays the WhatsApp platform (gross margin 12% / -5% / 17%, under the 60% digital floor). K7 used on the sub-S\$80 hamper variant (about S\$963 profit per season, less S\$300-1,500 insurance, no profit path). K1 not used.

COGSWORTH-COO

Hours are my **estimates** from per-task assumptions: admin 1 h/wk; outreach 3 h/wk; onboarding a WhatsApp client 6 h one-off; support 1.5 h/month per light client, 2 to 2.5 for client data. Legal facts were checked today and sources are linked. Where I could not confirm a point, it is labelled.

1. Weekly hours vs the 10-hr cap

Idea (merged)	Launch (wks 1-8)	Steady state	Verdict
Centre Desk (SERVO A + LEDGER L3 + my #5): build 4, outreach 4, onboarding 2, admin 1	11	10 clients: 8.9. 13 clients: 9.9	Fits. Cap about 12-13 light clients
Recall engine , vets and groomers (PROBE D + L2 vertical)	11	8 clients: 9.6	Tight
Same engine for GPs, dentists or maid agencies (2.5 h/mo each, plus DPA paperwork)	11	8 clients: 10.6	Breach
CoachKit : outreach 3, 2 setups/mo at 5 h, support 1.5, admin 0.5	6	7.3	Fits; the problem is willingness to pay, not hours
Hamper , self-packed: sourcing 3, outreach 5, admin 2.5, pack and deliver 4, billing 1	15.5 for 8 wks, three windows a year	Yearly average about 7.5	"That's 15 hours a week. You have 10." Outsourced packing and delivery: 9.5
Dementia kit : B2B plus B2C, 30 orders/mo	9	8.1; 9.3 at 40 orders	Fits, but caregiver messages are uncapped
PDPA-Pack , white-label	7 (15 h one-off build)	4	Fits

B2B capacity: one person supports about **12 to 13** light WhatsApp or booking clients in 10 hrs/week. That falls to **8** for clients with sensitive data, and rises to about 17 if partners feed leads so outreach drops to 1 h. At S\$129/mo that is **S\$1.7k MRR**, which is LEDGER's base case. The cap equals the plan, so growth must come from price (S\$250+), not client count.

2. Licences and compliance: a form, a fee, or a wall

Item	Class	Detail	Source
DPO appointment	Form, free	Required of every organisation	PDPC DPO
Data intermediary role (we hold clients' patient, student or maid data)	Contract and process	We carry the protection and retention duties. A breach must be reported to the client "without undue delay"	PDPC DI guide
Health data	Higher care, not a ban	PDPA has no separate "sensitive" tier, but PDPC expects stronger protection and consent for health information. WhatsApp use is allowed with consent	PDPC healthcare guidelines
NRIC and FIN numbers	Do not collect	General prohibition. This hits maid-agency and clinic recall	PDPC NRIC guidelines
DNC	Client's duty	Applies to B2C marketing messages, not B2B. Whether appointment reminders count is unconfirmed	PDPC DNC (not fetched)
HSA device (dementia kit)	Depends on product	HSA says devices have a physical or mechanical effect on the body and diagnose, alleviate or treat a condition. General-wellness items are out. Manufacturers, importers and wholesalers need a licence, and Class A is exempt only from product registration	HSA
Electrical items	Form	Controlled goods need CPS registration	CPS
Hamper repacking	Wall if you repack	Unlicensed repacking was fined S\$2,500. Buying sealed packs: unconfirmed , so ask SFA	SFA

(a) Dementia kit, ruling. I over-blocked in R1 (my blind spot). PROBE is right: a **non-electronic, non-monitoring kit** (labelled storage, large-print calendar clocks, photo albums, contrast tableware) with **no treatment claims** sits on the wellness side of HSA's own line. It needs no licence. Three things push a kit into device territory: body-worn sensors or GPS trackers, any "reduces agitation" claim, and medication dispensers. HSA has not confirmed whether wander door-alarms count, and I could not find a ruling. I still hold the wall for monitors: a wholesaler licence needs GDPMDS or ISO 13485, from my R1 source, which I should re-verify. **K4 is not used**; the cut becomes "kit, yes; monitors, no".

(b) WhatsApp products. Each is paperwork, not a blocker: consent wording, a DPA with each client, no NRIC or FIN, and a data-retention rule. Hours are already counted above.

3. Attack table

Idea	Assumption	Severity	Cheapest test
Centre Desk	"1.5 h/wk for 5 clients" (SERVO). Onboarding and Meta template approval are my 6 h one-off per client	Major	Onboard one free pilot and time-log it
Recall engine	Health-adjacent clients tolerate S\$99-199/mo; vets lack reminders	Major (PROBE's own flag)	Ask 3 vet practices what they use now
CoachKit	Coaches pay S\$40-99/mo against free tools	Major	Talk test of 5 NROC coaches
Hamper (BEACON 8 peak, LEDGER 6)	Both undercount peak. I count 15.5	Major	Written quote from a licensed packer; need 30% margin or more after fees
Dementia kit	The 5 SKUs are non-device	Major, not Fatal	Run the SKU list through HSA's classification tool
PDPA-Pack	Cosecs will not build their own; we avoid selling legal advice	Major	Ask 3 cosecs or accountants if they would white-label

I tried to break **Centre Desk** on licences and couldn't, because it needs none beyond the PDPA paperwork above. I tried to break **CoachKit** on hours and couldn't, because it totals 7.3.

Concessions. My #2 (direct-import dried food) dies: 7 hrs for a 15-25% margin and S\$530 profit. My hamper hours (15 peak) were right, and the fix is outsourced packing. I defend my R1 cuts of medical-device resale only.

4. Merges

- 1. **Centre Desk + Recall + Helper-Cycle = one WhatsApp engine**, verticals tested in order: tuition and studios, then vets and groomers. Clinics and agencies last.

- 2. **PDPA-Pack folds into the engine** as the consent-and-DPA template bundle we ship with it. That removes the liability of a standalone product.
- 3. **Hampers + gift quote engine + Agent-Gift Desk = one preorder-only idea** with outsourced packing.

5. TOP 5 and kills

- 1. **Centre Desk**: no licence, 9 hrs, recurring.
- 2. **Vet and groomer recall**: same engine, new vertical, 9.6 hrs.
- 3. **CoachKit**: 7 hrs, no licence, the Chairman's seed; WTP is untested.
- 4. **Dementia kit, non-device only**: strongest demand, fits hours, needs the HSA check first.
- 5. **Preorder hamper, packing outsourced**: time-boxed; deposits must start now for CNY.

Kill: Helper-Cycle (FIN data, small slow-paying agencies). Monthly dried-food drop (\$530 profit, a TradeNet permit every shipment). Gift quote engine (a 20 h build to dodge no problem). Supplier emissions pack (8 hrs of consulting). Grant-ready tool (fails K5 until EDGE rules are published).

6. Vetoes

K2: not used. Hamper self-packed breaches at 15.5, so I attach a condition (outsource) instead. **K4**: not used.

6. Assumptions register and decision log

Assumptions register (A-001 to A-016)

Every load-bearing assumption the company relies on. If an assumption is **Killed**, every decision depending on it gets reopened.

Status: **Untested**, **Testing**, **Validated** (evidence linked), **Killed** (evidence linked).

ID	Assumption	Owner	Challenger	Severity if wrong	Status	Cheapest test	Evidence	Updated
A-001	Chairman can sustain about 10 hrs/week on the business alongside other commitments	Chairman	COGSWORTH-COO	Major	Untested	Track actual hours for 2 weeks		2026-10-08
A-002	Partnerships (resellers, referrers) can deliver the first customers without a large ad budget	BEACON-CMO	LEDGER-CFO	Fatal	Untested	5 partner conversations per shortlisted idea		2026-10-08
A-003	Tuition/enrichment centres pay about S\$150/mo plus setup for an enquiry-to-trial-booking front desk, despite SchoolTracs bundling WhatsApp from S\$55/mo	SERVO-CTO	PROBE-CRO	Fatal	Untested	5 talk tests quoting the all-in price; no source shows any vendor offering this front desk	Incumbent pricing is vendor-written (schooltracs.com, 23 Jul 2026)	2026-10-08
A-004	Client pays the WhatsApp platform seat on its own account and still buys (all-in S\$246-282/mo). If ROD pays, gross margin is 12% / -5% (K6 veto)	LEDGER-CFO	SERVO-CTO	Fatal	Untested	Quote all-in price in the talk test; offer a free-app manual pilot	Sleekflow pricing, checked 2026-10-08; Meta SG rate sources conflict, immaterial	2026-10-08
A-005	One person supports 12-13 light WhatsApp/booking clients in 10 hrs/wk (about 1.5 h per client per month plus 6 h onboarding)	COGSWORTH-COO	SERVO-CTO	Major	Untested	Onboard one free pilot and time-log it	COGSWORTH r2 estimate	2026-10-08
A-006	Coaches pay S\$500 setup + S\$49/mo against Vibefam (from S\$89/mo), Acuity and free Linktree	BEACON-CMO	LEDGER-CFO	Major	Untested	Landing page + Stripe link to 10 coaches; count deposits	Competitor prices sourced; willingness to pay unsupported	2026-10-08
A-007	SportSG or sport associations will send a member list or mail the offer (the registry has 6,100 coaches but is not a referral list)	BEACON-CMO	LEDGER-CFO	Fatal	Untested	Ask 2 associations to mail a member offer	Registry size sourced (SportSG); sharing unverified	2026-10-08

ID	Assumption	Owner	Challenger	Severity if wrong	Status	Cheapest test	Evidence	Updated
A-008	Warm-intro to sale conversion is 3-8% (base), not below 3%. Below 3% means 330+ intros per 10 clients	BEACON-CMO	LEDGER-CFO	Fatal	Untested	20 partner-warm intros asking a S\$100 deposit	All conversion rates are estimates (PROBE)	2026-10-08
A-009	CNY 2027 hampers: HR buyers commit deposits by 14 Nov at S\$150+/box with at least 30% margin after fees and insurance (S\$300-1,500). Decide by 22 Oct	BEACON-CMO	LEDGER-CFO	Fatal	Untested	10 HR asks + 3 packer quotes + insurance quote by 21 Oct; go needs about 3 buyers, about 60 boxes, net season profit of S\$1,000+ (RIVET threshold, estimate)	Box price claims contradict (S\$20-250); margin unsourced; deadline from patchandbagel guide	2026-10-08
A-010	Buying sealed, pre-packed hampers needs no SFA licence for ROD; only repacking does	COGSWORTH-COO	PROBE-CRO	Major	Untested	Written SFA query; use a licensed packer	SFA fined unlicensed repacking S\$2,500 (2024); sealed-pack case unconfirmed	2026-10-08
A-011	The dementia kit SKUs (storage, large-print clocks, albums, contrast tableware) are non-device and need no HSA licence	COGSWORTH-COO	PROBE-CRO	Major	Untested	Run each SKU through HSA's classification tool; wander door-alarms unconfirmed	HSA device definition, checked 2026-10-08	2026-10-08
A-012	Caregivers or day-care managers pay S\$80-250 for a non-device kit despite Dementia Singapore's own store and means-tested caregiver grants, and a named introducer exists (K5)	PROBE-CRO	BEACON-CMO	Major (near-Fatal for K7)	Untested	5 caregiver/day-care calls; preorder 10 units of 1 SKU	Dementia 74k to 152k projection (MOH); willingness to pay unsupported	2026-10-08
A-013	Vets and groomers lack a distributor for non-meat treats, and AVS needs no licence for non-meat treats or accessories	BEACON-CMO	COGSWORTH-COO	Major	Untested	Written AVS query; 20-unit consignment at 3 groomers	Pet-product growth slowed 2025 (Euromonitor, secondary); AVS unconfirmed	2026-10-08
A-014	A part-time B2B service at 10 hrs/wk (cap about S\$1.7-3.2k/mo base, S\$1.2-1.6k downside) is acceptable as a stepping stone, or the Chairman raises hours	RIVET-CEO	LEDGER-CFO	Major	Untested	Chairman states the S\$/mo target for "steady income"	LEDGER r2 and COGSWORTH r2 estimates	2026-10-08
A-015	The Chairman's employment contract permits a side business	Chairman	COGSWORTH-COO	Fatal	Untested	Read the contract before any invoice (open question in 01-constraints.md)		2026-10-08

ID	Assumption	Owner	Challenger	Severity if wrong	Status	Cheapest test	Evidence	Updated
A-016	Cosecs and accountants will white-label a PDPA pack rather than build their own, with liability kept low	BEACON-CMO	SERVO-CTO	Major (reserve idea)	Untested	Ask 3 cosecs to white-label; lawyer read S\$500-1,500 if it proceeds	DPO prices S\$100-500/mo (SG Secretary Services, 2026-10-08)	2026-10-08

Decision log

Newest first. Only the Chairman ratifies. RIVET-CEO drafts the entries.

ID	Date	Decision	Proposed by	Dissent	Chairman	Meeting
D-002	2026-10-08	DRAFT: Adopt the clean-slate shortlist as a test list. Ranked: 1 Centre Desk (WhatsApp enquiry-to-trial front desk, tuition first), 2 Club and Coach Desk, 3 CNY Gifting Desk (capped zero-spend test, decide 22 Oct), 4 Dementia home kit (non-device), 5 Vet-Shelf. Reserves: PDPA add-on, Lead responder. Run 14 days of no-spend tests, then re-rank	RIVET-CEO	BEACON: Centre Desk has no wedge against bundled incumbents. LEDGER: partner supply for #2 unproven. PROBE: no demand evidence for #3. COGS and SERVO: slot 5 weak. Vetoes in force: LEDGER K6/K7, SERVO self-hosted API	PENDING	synthesis
D-001	2026-10-08	Founded ROD Inc. with 6 robot executives and the Chairman	Chairman	None	Ratified	n/a

7. Sign-off

This report records the full discussion of the ROD Inc. board on 8 October 2026, including dissent. Nothing in it has been acted on. No one outside the company has been contacted, and no money has been spent. Every number is an estimate unless a source is shown in the underlying section.

Respectfully submitted,

RIVET-CEO

RIVET-CEO, Chief Executive Officer

Robots of Doom Incorporated

8 October 2026

"Great debate. Now, what do we do on Monday?"

Board members who contributed

Robot	Title	Vetoed held
LEDGER-CFO	Chief Financial Officer	K1 capital, K6 margin, K7 time to profit
SERVO-CTO	Chief Technology Officer and engineer	Build feasibility
COGSWORTH-COO	Chief Operating Officer (operations and compliance)	K2 weekly hours, K4 legality
PROBE-CRO	Chief Research Officer	K3 demand stability; evidence block
BEACON-CMO	Chief Marketing Officer (growth and partnerships)	K5 path to customers
RIVET-CEO	Chief Executive Officer	None (tie-breaker only)

Chairman's ratification of decision D-002

Adopt the clean-slate shortlist as a test list and run 14 days of no-spend tests before re-ranking.

☐ Ratified ☐ Vetoed ☐ Sent back (note which slot or question):

Caleb, Founder and Chairman. Signature and date.
